## **Job Shadowing - Student Form**

This form is for your personal reflection. Many of these questions will be naturally answered in your observation and discussions throughout the day. At the end of the day you may want to directly ask the questions that were not discussed.

Student's Name:	Mohamad Abou Ali		
Date/Duration of Visit:	14, 16 June 2025, approx. 4–5 hours each		
Company Name:	Chtoura Hospital		
Company Department(s) Job Shadowed:	Surgery and Anaesthesia Department		
Questions Around the Work of the Employee You Job (These questions should be repeated if you job shade) What is your exact job title?	ow more than one person.)		
What is your exact job title?	I was shadowing Dr. Marwan Wardany, who is a practicing anaesthesiologist working in the surgical unit.		
What do you like about your job?	As a 2nd-year medical student on one of my first clinical rotations, I am not employed in this field, but I found the anaesthesiologists' role very interesting. I appreciated observing how anaesthesia helps patients stay pain-free and stable during surgery and how crucial the anaesthesiologist is to the overall surgical team.		
What type of education and training prepared you	From my perspective as an observer, I noticed that the job can be very demanding—especially during long surgeries that require continuous focus. The level of pressure and responsibility seemed high, and I imagine that can be physically and mentally exhausting.  Medical school followed by specialized residency training in		
What type of education and training prepared you for this career field/job?	Medical school followed by specialized residency training in anaesthesiology and clinical experience in operating rooms.		

What type of education and training would you recommend for someone starting out in this career?  Is there a possibility for further career advancement?  Is there a possibility for further career advancement?  What types of skills are the most important in your job?  What types of skills are the most important in your job?  Can you describe a typical day at work?  Starting with pre-operative evaluations, administering anaesthesia, continuous intra-operative monitoring, managing airways, and post-operative patient assessments Managing patient physiology in real time during surgery and ensuring their safety under anaesthesia.  What is the most interesting part of your job?  What is the most challenging/difficult part of your bob?  What is the most challenging/difficult part of your bob?  What is the most challenging/difficult part of your bob?  What is the most challenging/difficult part of your bob?  What is the most challenging/difficult part of your bob? 	condition intra-operatively. Surgical Technician / OR Assistant: Prepared surgical equipment, supported surgical procedures, and handled	
	instrument sterilization.	
What are the main tasks/duties?	Pre-op evaluation, anesthesia administration, intra-op monitoring, airway management, post-op care.	
List and describe some of the main equipment or software you observed.	Anesthesia machine, ECG/BP/SpO₂ monitors, laryngoscope, IV pumps.	
Did you notice who the employee reported to? (What is their position?)	Collaborated with OR manager and surgical team leaders.	
Was the specific employee responsible for other employees? How many?	Yes, supervised anesthesia support staff and coordinated with the surgical team.	
Were you given an opportunity to perform/assist with any tasks that you observed? Give details of the tasks.	No tasks performed. Observation only due to student status.	
If you performed any tasks, did they help you to better understand what your choice of career involves?	Yes, observation helped me understand the complexity and responsibilities in anaesthesiology.	
Workplace Safety and Dress		
Did you see any health and safety signs?	Yes—sterile zone signs, PPE requirement signs,	
Draw pictures of them on the back of this form.	emergency instructions.	
Did you have any safety regulations explained to you on your first day? Give details.	Yes—briefing on hygiene, sterile areas, and PPE protocols.	
Did you see any employees wearing safety clothing? Describe what you saw.	Yes—scrubs, gloves, gowns, caps, masks, and shoe covers were worn.	
Have you noticed any special safety equipment or protection that is required?	Yes—sterile instruments, sharps containers, disposable gowns, monitors.	
Other than safety clothing, what do you notice about workers' dress/dress code?	Clean scrubs, ID badges, closed-toe footwear—professional attire.	
Overall Impressions		
Did you see an area of work that might interest you?	Yes, anaesthesiology captured my interest due to its critical role.	

What were some of the most interesting things you learned about the workplace?	Teamwork, real-time monitoring, quick responses, and tech integration.
